

**OPTIMIZE YOUR WORK ENVIRONMENT
AND PROTECT YOUR BUILDING INVESTMENT**

TECHNOLOGY & MAINTENANCE

TECHNOLOGY OPTIMIZATION

A great building is more than just concrete, steel and glass. The technology infrastructure, systems and services you choose are also critical to “future-proof” your building investment.

LindsayTech Client Services will help you navigate the technology options available for your building via our trusted partners - from carrier services and unified communications, to premises security and building controls. Our objective is to provide reliable advice that will help you choose the optimal technology for your business.

LINDSAYTECH MAINTENANCE PLANS

LindsayTech Maintenance Plans are designed to maximize the lifespan of your building, which reduces repair, insurance and energy costs while offering worry-free occupancy.

Regular inspections and preventative maintenance planning helps avoid costly repairs and workplace interruptions due to premature building or systems degradation.

Plans offer priority service response, scheduled periodic inspections, warranty management and recommendations to ensure preventative maintenance and repairs occur.
