

# PROJECT DELIVERY

## DESIGN BUILD

Our collaborative approach and depth of self-performing capabilities, including in-house design, engineering and construction, enables us to deliver an integrated and cost-effective building experience. Offering single-source responsibility for all aspects of the project with an open communication process, Design Build projects executed The Lindsay Way deliver great value.

## CONSTRUCTION MANAGEMENT

Our construction management service enables us to essentially become an extension of your management team to help you deliver your project, your way. With expertise across a wide range of projects and sectors, we draw upon in-house resources and an extensive network of external suppliers, trade contractors and consultants to ensure you get the project results that you envision.

## GENERAL CONTRACTING

Our estimators, project managers, project coordinators and site superintendents take pride in offering competitive bids, quality work and helping our clients maximize efficiency. Via consultation and proactive analysis of each project, our project managers assign the best tradespeople to ensure your building goals are achieved, on time and on budget.

## SPECIAL PROJECTS

From repair and renovations work, to custom projects and interior fit-ups, our Special Projects team offers both in-house and subcontract capabilities to handle any size job, large or small.

**Trusted Building Partners since 1959, Lindsay Construction has the depth of resources and experience to make your project a success.**

**Lindsay Business Management System (LBMS)**
